Laser Cut Cabbage Tree Instructions

|	
Take approximately 200mm long piece florists wire and coat the top section in White glue	Cover in fine ground foam. This will form the trunk inside the head
Use as many heads as you'll need to make a good tree	Add a small piece of Double Sided Tape to the wide end of the head
Colour the dead leaves greys and browns to your liking. You can add extra colour to the upper leaves.	Peel off the double sided tape

Laser Cut Cabbage Tree Instructions

Stick the top of the wire to the tape and start the roll

Add some white glue along the centre of the head and finish rolling

Clamp the roll in and clothes peg

When the glue is set fold the top leave down to form the head

Curl the leaves to get the right look

Repeat and make a good number of heads

Laser Cut Cabbage Tree Instructions

Twist the wire trunks together in two's and three's to get a natural look. Make a few bunches of heads.

Add the bunches together and continue twisting the wires to from the trunk.

Coat the wire trunk in white glue

Cover in the fine ground foam.

Colour the trunks with some dry brushing to get the smoother bark look.
